

LEGEND AND DEFINITIONS

Water Courses Line thickness represents water volume capacity.

Perennial Water Channel that reliably flows year-round, creating rich aquatic habitat

Intermittent Water Channel flows above ground in segments; shallow-groundwater provides for riparian habitat through-out the channel

Ephemeral Washes Also called arroyos, these channels flow seasonally, providing unique habitat year-round

Springs Delicate sites where groundwater reaches the surface providing refugia for desert wildlife. Please do not disturb.

Wildlife Linkages Wildlife often follows water corridors to find critical passage between Sky Island mountains.
